

BoundType

```
graph BT; A[Print_If_Bounded< TypeBounded, BoundType >] --> B[BoundType];
```

The diagram illustrates a relationship between two types. At the top is a box labeled 'BoundType'. Below it is a purple arrow pointing upwards towards the 'BoundType' box. To the right of the arrow, the text 'hi' is positioned above a vertical line, and 'low' is positioned below it. At the bottom of the diagram is a grey box with a black border containing the text 'Print\_If\_Bounded< TypeBounded, BoundType >'. This indicates that 'Print\_If\_Bounded' is a specialization or inheritance of 'BoundType'.
